

7.5 Prevention of Healthcare-Associated Infections

(Reviewed 11/3/2023)

As members of the health care team, students are required to follow the established Center for Disease Control (CDC) guidelines for healthcare-associated infections. Following these procedures will facilitate the prevention of exposure to potential infections.

Current guidelines and recommendations for environmental infection control, hand hygiene, immunizations, infectious diseases, isolation precautions, nosocomial infections, etc., are found on the CDC website.

All students are required to be familiar with the information found on the CDC website.
