Cory Hamilton. July 2018. The role of NADPH oxidases in the organic dust induction of inflammatory gene expression in lung epithelial cells. Master's Thesis (Biotechnology), The University of Texas Health Science Center at Tyler.

Regina Moyana. May 2019. Regulation of lung inflammatory mediators by bacterial extracellular vesicles isolated from organic dust. Master's Thesis (Biotechnology), The University of Texas Health Science Center at Tyler.

Keerthi Gangam. May 2013. Regulation of surfactant protein (SP) gene expression by organic dust. Master's Thesis (Biotechnology), The University of Texas Health Science Center at Tyler.

Shiva K. Bandari. August 2012. Regulation of interleukin-8 (IL-8) gene expression in THP-1 cells by organic dust. Master's Thesis (Biotechnology), Joint Program of Stephen F. Austin State University, Nacogdoches, TX & The University of Texas Health Science Center at Tyler.

Graduate Fellowships/Interns

VJ: Drs. Velmurugan Meganathan and Shilpa Kusampudi are working as postdoctoral fellows

AC: A research graduate assistant is training with the research team by developing protocols, setting up equipment and computer software, and is collecting data under supervision of Dr. Buddy Sirikul, Professor, SLU Kinesiology and Health Studies department

F Soto Mas: Daisy Rosero is a student in the UNM College of Population Health, Master of Public Health program.
