

MATH 2413 Calculus I

Instructor: Prof. Regan Beckham

E-mail: rbeckham@uttyler.edu (preferred contact method)

Office: RBN 4012

Office Hours: TBA, by appointment

Class Meeting Time: MWF 9:05A-10:00A (SCB 0214), TR 8:30A-9:25A (RBN 4034)

Required Text: *Class Notes*

If you chose to take this class you will:

- *Read the book* – Read the material being covered prior to attending class and again after.
- *Attend Class* – You should not take this course if you are not committed to attending class.
- *Complete Homework* – Homework completion is vital to the understanding of the material.

Grading Policy

Your final grade will be based on the following:

Exams

There will be **five** 20 point exams throughout the semester. Every exam is comprehensive.

— — —

Your final grade will be no more harsh than the following scale

Percentages

100 - 85 A, below 85 - 70 B, below 70 - 50 C, below 50 - 40 D, below 40 F

— — —

A bit about grading

Below is the grading scheme that will be used for all exam problems. Whether this splits up to each part of a multi-part problem depends on the necessary work to move through each problem.

- 0 - No progress or relevant information given for the problem
- 1 - Some progress which could lead to a correct solution
- 2 - Significant progress, major elements present, partial explanation/proof
- 3 - Essentially complete and correct solution, with minor gaps, errors, or lack of explanation
- 4 - Fully correct and complete solution with all relevant information and explanation

UT Tyler Honor Code

To embrace honor and integrity that will not allow me to lie, cheat, or steal, nor to accept the actions of those who do.

Plagiarism and Academic Dishonesty

Any work submitted must represent your own effort!

Make-up Policy

Make-ups for documented absences that are required as part of a UT Tyler obligation (e.g. athletes participating in an event, participating in a debate contest, etc.) or for religious observation will be granted. For all make-ups of this type, prior notification of at least one week and documentation are required.

Classroom Policy

When you attend class you are to be actively engaged in the classroom activity. Also, you are to be respectful of those around you and conduct yourself in a collegial manner. Students not adhering to this may be asked to leave the classroom.

A bit about study groups

In my experience, study groups are most successful when the following is done. The problems should be attempted by the group members before the group meets. If problems are worked from start to finish in the group only the strongest students will benefit. You should limit the amount of outside aid you get in the course. I do not recommend tutoring. If you have questions come see *me*.

Student Learning Outcomes

By the end of this course, the successful student will

- have a thorough understanding of the limit of a sum process (*integration*) and be able to use it in calculation to solve problems.
- have a thorough understanding of the limit of a difference quotient (differentiation) and be able to use it in calculation to solve problems.
- see the relationship between the two.
- be able to solve practical applications of The Calculus to the physical and social sciences.
