

Precalculus, Mathematics 2312, Section 002
Spring 2025

Instructor: Dr. William Blair

Office: RBN 4008

Email: wblair@uttyler.edu

Course Schedule: Class meets in RBN 4027 TuTh 2:00PM - 3:20PM.

Course Website: You MUST activate your Canvas account. To do so, go to <https://uttyler.edu/canvas>. This is also the address to login. If you are registered in the course, you already have access to the course. All important documents will be posted on Canvas.

Office hours: 9:30 AM - 11:00 AM TuTh in RBN 4008 (or by appointment)

Required Text: Precalculus from OpenStax (Digital ISBN: 978-1-951693-39-8). This is an open-access textbook, meaning it is freely available at the following link: <https://openstax.org/details/books/prec calculus-2e/> You can read the book online, or download PDF, iBooks, or Kindle versions of it. If you prefer to have a print copy, you can purchase one. At the OpenStax website listed above, there is a link to order a print copy.

Course Description: This course is a survey of college algebra, trigonometry, and analytic geometry to prepare students for calculus. Topics include algebraic functions and their graphs, exponential and logarithmic functions, trigonometric functions and identities, and two and three dimensional analytic geometry. Credit not given for both MATH 2312 and MATH 1316.

Course Prerequisites: Appropriate score on SAT, ACT, or TSI

Course Outline: Chapters 1-7 of the text and other chapters, in part or in full, as time permits

Student Learning Outcomes: Upon completion of this course, students should be able to do the following.

- Develop analytical reasoning to solve algebraic problems such as finding the solutions to polynomial, rational, exponential, logarithmic, and trigonometric equations, as well as finding inverse functions
- Represent trigonometric functions by drawing relevant pictures on the unit circle, by writing the correct trigonometric definitions, and by verbal description
- Demonstrate a critical understanding of functions by graphing and analyzing functions, evaluating functions at specific real numbers and at variable values, computing new functions from old functions through algebraic operations, and applying known theory such as the Factor Theorem to factor polynomials and find their zeroes.
- Calculate the values of trigonometric functions based on right-triangular and circular definitions

- Solve right triangles given appropriate information about sides and angles
- Prove the validity of trigonometric identities

Approximate Course Schedule:

Week	Textbook Sections
1 (Jan 14 - 16)	Chapter 1
2 (Jan 21 - 23)	Chapter 1 continued
3 (Jan 28 - 30)	Start Chapter 2
4 (Feb 4 - 6)	Chapter 2 Continued
5 (Feb 11 - 13)	Start Chapter 3 (Exam 1 Thursday February 13 over Chapter 1 and Chapter 2)
6 (Feb 18 - 20)	Chapter 3 Continued
7 (Feb 25 - 27)	Start Chapter 4
8 (Mar 4 - 6)	Finish Chapter 4, Start Chapter 5
9 (Mar 11 - 13)	Finish Chapter 5 (Exam 2 Thursday March 13 over Chapter 3 and Chapter 4)
* (Mar 18 - 20)	SPRING BREAK (no class)
10 (Mar 25 - 27)	Chapter 6
11 (Apr 1-3)	Chapter 6 Continued
12 (Apr 8 - 10)	Start Chapter 7 (Exam 3 Thursday April 10 over Chapter 5 and 6)
13 (Apr 15 - 17)	Chapter 7 Continued
14 (Apr 22 - 24)	Finish Chapter 7 and review
15 (Apr 28 - May 2)	Finals Week

Grading: Scores will be posted on Canvas. After the end of the semester, final course grades will be available on my.uttyler.edu. A final course grade of 90% is guaranteed to be at least an A, a final course grade of 80% is guaranteed to be at least a B, a final course grade of 70% is guaranteed to be at least a C, and a final course grade of 60% is guaranteed to be at least a D. All grades below D will be F. The breakdown of your final course grade into categories is given below.

Homework: 25%

Quizzes: 20%

Midterm exams: 10% each (there will be three)

Final exam: 25%

If you have any questions about the grading of a particular quiz or exam, you must contact me no more than one week after the day I return the graded assignment in class, whether you are present during that class or not.

Attendance: It is your responsibility to attend class. Attendance is mandatory. This means, among other things, coming to class on time and prepared. Before class

begins, you should turn off cell phones and any other electronic devices. Students are responsible for all announcements made during lecture.

Homework: Homework will be assigned regularly via the online platform WeBWorK. Your temporary WeBWorK password is uttyler in all lowercase letters. You should change the password immediately upon logging into WeBWorK for the first time. Your WeBWorK username has already been sent to you in an email to your patriots email account, provided you registered for the course before January 5 2025. If you registered after that date, you must email Dr. Blair to let them know you need an account. This is your responsibility, and you must do it immediately. The link to our course's WeBWorK page is posted in a Canvas announcement. More information on logging into and using WebWork is available on Canvas in a separate document.

In general, a new homework assignment will become available on WeBWorK every Monday. See WeBWork for specific due dates. The WeBWorK system provides you with instant feedback on your answers, as well as unlimited attempts to complete most problems. You should use this to your advantage. You are required to successfully complete all assigned problems on WeBWorK. Late homework will NOT be accepted. When computing your final homework grade, I will use your total score on all the WeBWorK problems. For example, if there are a total of 150 problems throughout the semester, and you successfully complete 120 of them, your homework grade will be 80%.

Quizzes: There will usually be quizzes given each week that there is not an exam. Quizzes will usually be given at the end of the class period. The quizzes will give you the opportunity to identify weaknesses before the next exam. Generally, the quiz will cover the material from the week's class periods but could utilize previous material also.

Exams: There will be 3 midterm exams and 1 final exam.

Final Assessment: The final exam will be cumulative. The final exam is Tuesday, April 29 2025 2:00 p.m.-4:00 p.m.

Cell Phones: Cell phones are not permitted in class. You must silence them and put them away before class begins.

Calculators: Calculators will not be allowed on quizzes nor on exams. You will need to be proficient in fractions and basic computations. Many homework problems will need to be done without calculators. Study accordingly. Towards the end of the semester, calculators may be allowed on some portions of the exams. When allowed, you may use scientific, non-graphing calculators. You may not use your phone. However, all work must be shown. Many different types of calculators will work well, but the **TI-30X IIS is recommended**.

Absences: Make-ups for **documented** absences that are **required** as part of a UT Tyler obligation (e.g. athletes participating in an event, students participating in a debate contest, etc.) or for religious observation will be granted. For all make-ups of this type, prior notification of at least one week and documentation are required. Other make-ups are granted only in extreme cases and at the sole discretion of the instructor. Prior notification is still required. **Under no circumstances will make-ups be granted without prior notification.** Leaving early for a break is NOT grounds for a make-up, so please make your travel plans accordingly. In almost all cases, missed work will be assigned a 0.

Academic Integrity: Your work must be your own. Violations will be processed according to the established guidelines of the department, college, and university. Violations of academic integrity include, but are not limited to, cheating, fabrication, or plagiarizing. A range of academic sanctions may be taken against a student who engages in academic dishonesty. Below are ideas related to academic integrity.

Resources you are encouraged to utilize in this course include the textbook and unassigned problems, notes from class, assigned homework problems, your fellow Math 2312 students, the Math Learning Center, and your instructor. E-mail is the best way to contact me. I reply to email from 9:00 A.M.–4:00 P.M. Monday–Friday.

A note about a resource NOT allowed in this course: while the internet may be a valuable resource, using it to unethically acquire answers for your work will be considered a violation of academic integrity and processed accordingly. Similarly, copying answers from other students' assignments, past or present, violates the idea that your work must be your own.

University Policies: January 27 is this semester's Census Date, the deadline for all registrations, schedule changes, and section changes. March 31 is the last day to withdraw from one or more courses. For university policies concerning Students' Rights and Responsibilities, Grade Replacement/Forgiveness, State-Mandated Course Drop Policy, Disability Services, Student Absence due to Religious Observance, Student Absence for University-Sponsored Events and Activities, Social Security and FERPA Statement, please see the University Policies and Information file on this course's Canvas page.

Course Policy Regarding AI:

UT Tyler is committed to exploring and using artificial intelligence (AI) tools as appropriate for the discipline and task undertaken. We encourage discussing AI tools' ethical, societal, philosophical, and disciplinary implications. All uses of AI should be acknowledged as this aligns with our commitment to honor and integrity, as noted in UT Tyler's Honor Code. Faculty and students must not use protected information, data, or copyrighted materials when using any AI tool. Additionally, users should be aware that AI tools rely on predictive models to generate content that may appear correct but is sometimes shown to be incomplete,

inaccurate, taken without attribution from other sources, and/or biased. Consequently, an AI tool should not be considered a substitute for traditional approaches to research. You are ultimately responsible for the quality and content of the information you submit. Misusing AI tools that violate the guidelines specified or this course (see below) is considered a breach of academic integrity. The student will be subject to disciplinary actions as outlined in UT Tyler's Academic Integrity Policy.

For this course, AI is **not permitted** in this course at all.

Notice: All policies and information above provide general guidelines for the course and may be amended throughout the course as needed at the discretion of the instructor. Any changes will be directly communicated to students through email, announcement in Canvas, or verbally in the classroom.
