

COSC 2336 – Data Structures and Algorithms

Syllabus

Catalog Description:

Topics include recursion, the underlying philosophy of object-based and object-oriented programming, fundamental data structures (including stacks, queues, linked lists, hash tables, trees, and graphs), the basics of algorithm analysis, and an introduction to the principles of language translation.

Text Books:

Required:

Sedgewick, Robert & Schidlowsky, Michael, *Algorithms in Java, Parts 1-4*, 3rd Edition
ISBN# 9780201361209

Class Times:

COSC 2336.001 Lecture: MWF 12:20PM – 1:15PM COB255

Prerequisites or co-requisites:

COSC 1337, MATH 2413

Grading Policy:

Homework/Programs 100%

Homework/Project online submissions will be due via Canvas by 11:59PM Monday nights unless otherwise stated.

Late Submissions and Tests:

Assignments/Labs/Projects/Presentations will not be accepted after the due date.

Academic Dishonesty: You are expected to do your own work. You may assist each other with general concepts, but direct assistance with a particular assignment or any attempts to gain an unfair academic advantage will not be tolerated. Cheating is considered a serious academic offense both by the department and the University. It may result in a failing grade from this course for all parties involved. The instructor reserves the right to ask you to explain any assignment that you turn in to judge if the work is actually yours. AI generated work will not be accepted.

E-mail: danielmorris@uttyler.edu

Office Hours: MW 1:30PM –2:30PM and by appointment

Topic	Hours
Introduction to Data Structures	3
Brief Review of Java Fundamentals	3
Overview of Programming Principles and Software Engineering	3
Fundamentals of Recursion	3
Abstract Data Types	3
Linked Lists and List Processing	6
Introduction to Stacks and Queues	6
Algorithm Efficiency and Sorting	6
Introduction to Trees	6
Introduction to Graphs and Networks	3

Course Objectives:

Computer Science Department

1. Describe how the data structures in the topic list are allocated and managed in memory.
2. Describe common applications for each data structure in the topic list.
3. Write programs that implement the basic operations of each of the following data structures: array, records, strings, linked lists, stacks, and queues.
4. Compare and contrast the costs and benefits of dynamic and static data structures.
5. As related to the concept of recursion, give examples of its use, identify the base case(s) and the general case(s) of a recursively defined problem; describe its implementation using a stack; determine when appropriate for a problem; and implement, test, and debug simple recursive functions and procedures.
6. Using Big-O notation, determine the time and space complexity of simple algorithms.
7. Differentiate the computational efficiency of the main algorithms for sorting and searching.
8. Model problems in computer science using graphs and trees.
9. Implement the most common quadratic and $O(N \log N)$ sorting algorithms.
10. Be familiar with factors other than computational efficiency that influence the choice of algorithms, such as programming time, space overhead, maintainability, and the use of application specific patterns in the input data

Additional Policies:

Students Rights and Responsibilities

To know and understand the policies that affect your rights and responsibilities as a student at UT Tyler, please follow this link: <http://www.uttyler.edu/wellness/StudentRightsandResponsibilities.html>

Grade Replacement/Forgiveness

If you are repeating this course for a grade replacement, you must file an intent to receive grade forgiveness with the registrar by the 12th day of class. Failure to do so will result in both the original and repeated grade being used to calculate your overall grade point average. Undergraduates will receive grade forgiveness (grade replacement) for only three course repeats; graduates, for two course repeats during his/her career at UT Tyler.

State-Mandated Course Drop Policy

Texas law prohibits a student who began college for the first time in Fall 2007 or thereafter from dropping more than six courses during their entire undergraduate career. This includes courses dropped at another 2-year or 4-year Texas public college or university. For purposes of this rule, a dropped course is any course that is dropped after the 12th day of class (See Schedule of Classes for the specific date).

Exceptions to the 6-drop rule may be found in the catalog. Petitions for exemptions must be submitted to the Registrar's Office and must be accompanied by documentation of the extenuating circumstance. Please contact the Registrar's Office if you have any questions.

Disability Services

If you have a disability, including a learning disability, for which you request disability support services/accommodation(s), please contact Ida MacDonald in the Disability Services office so that the appropriate arrangements may be made. In accordance with federal law, a student requesting disability services/accommodation(s) must provide appropriate documentation of his/her disability to the Disability Services counselor. In order to assure approved services the first week of class, diagnostic, prognostic, and prescriptive information should be received 30 days prior to the beginning of the semester services are requested. For more information, call or visit Disability Services located in the University Center, Room 3150. The telephone number is (903) 566-7079. Additional information may also be obtained at the following UT Tyler Web address: <http://www.uttyler.edu/disabilityservices>.

Student Absence due to Religious Observance

Students who anticipate being absent from class due to a religious observance are requested to inform the instructor of such absences by the second class meeting of the semester.

Student Absence for University-Sponsored Events and Activities

If you intend to be absent for a university-sponsored event or activity, you (or the event sponsor) must notify the instructor at least two weeks prior to the date of the planned absence. At that time the instructor will set a date and time when make-up assignments will be completed.

Social Security and FERPA Statement:

It is the policy of The University of Texas at Tyler to protect the confidential nature of social security numbers. The University has changed its computer programming so that all students have an identification number. The electronic transmission of grades (e.g., via e-mail) risks violation of the Family Educational Rights and Privacy Act; grades will not be transmitted electronically.

Emergency Exits and Evacuation:

Everyone is required to exit the building when a fire alarm goes off. Follow your instructor's directions regarding the appropriate exit. If you require assistance during an evacuation, inform your instructor in the first week of class. Do Not re-enter the building unless given permission by University Police, Fire department, or Fire Prevention Services.
