

COSC 1315 – Programming Fundamentals for Non-CS Majors

Syllabus

Catalog Description:

Introduction to the fundamental concepts of procedural programming. Topics covered include data types, control structures, functions, arrays, files, and the mechanics of running, testing, and debugging. This course is for non-Computer Science Majors.

Text Books:

Required:

Java Illuminated

By Anderson, Julie

Edition : 6TH 24

Publisher : JONES+BART

ISBN 13 : 9781284250480

Class Times:

COSC1315.001 Lecture: MWF 12:20pm-1:15pm COBxxx

Grading Policy:

Test 60% (20% each)

Final Project 10%

Programs 30%

Homework/Project online submissions will be due via Canvas by 11:59PM on designated nights unless otherwise stated.

No late submissions will be accepted.

Late Submissions and Tests:

Assignments/Labs/Projects/Presentations will not be accepted after the due date.

Homework Policy:

All homework must be self-generated. **No AI or downloaded solutions will be accepted.** The use of Java Libraries outside those taught in class will not be used unless for added functionality beyond the purpose of the programming assignment (such as java.util.ArrayList, java.util.LInkedList, java.util.Stack, etc). The purpose of this class is to get the experience and knowledge of how these structures work, rather than how to use libraries that already do the work for you. Use of these libraries before introduced in class will result in a '0' grade.

Homework Policy (cont):

Group projects will be submitted individually by each team member to their Canvas portal. Files should all be submitted individually and not in a zip file, as the grading system cannot properly display zip file contents.

Academic Dishonesty: You are expected to do your own work. You may assist each other with general concepts, but direct assistance with a particular assignment or any attempts to gain an unfair academic advantage will not be tolerated. Cheating is considered a serious academic offense both by the department and the University. It may result in a failing grade from this course for all parties involved. The instructor reserves the right to ask you to explain any assignment that you turn in to judge if the work is actually yours. AI generated work will not be accepted.

Use of Artificial Intelligence (AI)

I expect all work students submit for this course to be their own. I have carefully designed all assignments and class activities to support your learning. Doing your own work, without human or artificial intelligence assistance, is best for your efforts in mastering course learning objectives. For this course, I expressly forbid using ChatGPT or any other artificial intelligence (AI) tools for any stages of the work process, including brainstorming. Deviations from these guidelines will be considered a violation of UT Tyler's Honor Code and academic honesty values.

Office Hours: Office Hours: MWF 10:00AM-12:00Noon, 2:30-5:00
TuTh 9:30 – 12:00

Course Topics:

Topic	Hours
Introduction to Java Programming Language and Programming Environment	3
Structured program development in Java	3
Data Types and Instance Variables	3
Software development methodology	3
Decision structures	3
Arrays and Strings	9
Functions	3
Debugging	3
Characters and Strings	3
Formatted Input/output	3
Binary and logic	6

Course Timeline:

Course Time Room	COSC1315 MWF 12:20-1:15 COB2xx
1/13/2025	Intro, Hello World, PC Anatomy
1/20/2025	No Class 1/20 (Monday) Chapter 1: Binary, Logic
1/27/2025	Logic, Command Line
2/3/2025	Chapter 2: Data Types, Variables, Math
2/10/2025	Chapter 3: Classes Wed, 2/12 Test 1 (Ch 1,2)
2/17/2025	Chapter 3: Strings, Methods
2/24/2025	Chapter 5: Flow of Control (If, Else, Nested Ifs)
3/3/2025	MidTerm Chapter 5: Switch Fri 3/7 Test 2 (Ch 3,5)
3/10/2025	Chapter 6: Loops - While, Do- While
3/17/2025	Spring Break
3/24/2025	Chapter 6: Loops: For
3/31/2025	Debugging, Reading Code Wed 4/2 Test 3 (Ch 6, read code)
4/7/2025	Chapter 8: Arrays
4/14/2025	Chapter 9: Multi-Dimensional Arrays
4/21/2025	A Map Game
4/28/2025	Final Project - Interactive Mapping Game

Course Objectives:

1. Analyze and explain the behavior of simple programs involving the fundamental programming constructs.
2. Modify and expand short programs that use standard conditional and iterative control structures and functions.
3. Design, implement, test, and debug a program that uses each of the following fundamental programming constructs: basic computation, simple I/O, standard conditional and iterative structures, and the definition of functions.
4. Choose appropriate conditional and iteration constructs for a given programming task.
5. Apply the techniques of structured (functional) decomposition to break a program into smaller pieces.
6. Describe the mechanics of parameter passing.
7. Discuss the importance of algorithms in the problem-solving process.
8. Identify the necessary properties of good algorithms.
9. Create algorithms for solving simple problems.
10. Use pseudocode or a programming language to implement, test, and debug algorithms for solving simple problems.
11. Discuss the representation and use of primitive data types and built-in data structures.
12. Explain the reasons for using different formats to represent numerical data.
13. Explain the objectives and functions of modern operating systems.
14. Describe the phases of program translation from source code to executable code and the files produced by these phases.
15. Identify and describe the properties of a variable such as its associated address, value, scope, persistence, and size.
16. Discuss the properties of good software design.
17. Explain the software life cycle and its phases including the deliverables that are produced.
18. Discuss debugging code to find logic errors

Additional Policies:

Students Rights and Responsibilities

To know and understand the policies that affect your rights and responsibilities as a student at UT Tyler, please follow this link: <http://www.uttyler.edu/wellness/StudentRightsandResponsibilities.html>

Grade Replacement/Forgiveness

If you are repeating this course for a grade replacement, you must file an intent to receive grade forgiveness with the registrar by the 12th day of class. Failure to do so will result in both the original and repeated grade being used to calculate your overall grade point average. Undergraduates will receive grade forgiveness (grade replacement) for only three course repeats; graduates, for two course repeats during his/her career at UT Tyler.

State-Mandated Course Drop Policy

Texas law prohibits a student who began college for the first time in Fall 2007 or thereafter from dropping more than six courses during their entire undergraduate career. This includes courses dropped at another 2-year or 4-year Texas public college or university. For purposes of this rule, a dropped course is any course that is dropped after the 12th day of class (See Schedule of Classes for the specific date).

Exceptions to the 6-drop rule may be found in the catalog. Petitions for exemptions must be submitted to the Registrar's Office and must be accompanied by documentation of the extenuating circumstance. Please contact the Registrar's Office if you have any questions.

Disability Services

If you have a disability, including a learning disability, for which you request disability support services/accommodation(s), please contact Ida MacDonald in the Disability Services office so that the appropriate arrangements may be made. In accordance with federal law, a student requesting disability services/accommodation(s) must provide appropriate documentation of his/her disability to the Disability Services counselor. In order to assure approved services the first week of class, diagnostic, prognostic, and prescriptive information should be received 30 days prior to the beginning of the semester services are requested. For more information, call or visit Disability Services located in the University Center, Room 3150. The telephone number is (903) 566-7079. Additional information may also be obtained at the following UT Tyler Web address: <http://www.uttyler.edu/disabilityservices>.

Student Absence due to Religious Observance

Students who anticipate being absent from class due to a religious observance are requested to inform the instructor of such absences by the second class meeting of the semester.

Student Absence for University-Sponsored Events and Activities

If you intend to be absent for a university-sponsored event or activity, you (or the event sponsor) must notify the instructor at least two weeks prior to the date of the planned absence. At that time the instructor will set a date and time when make-up assignments will be completed.

Social Security and FERPA Statement:

It is the policy of The University of Texas at Tyler to protect the confidential nature of social security numbers. The University has changed its computer programming so that all students have an identification number. The electronic transmission of grades (e.g., via e-mail) risks violation of the Family Educational Rights and Privacy Act; grades will not be transmitted electronically.

Emergency Exits and Evacuation:

Everyone is required to exit the building when a fire alarm goes off. Follow your instructor's directions regarding the appropriate exit. If you require assistance during an evacuation, inform your instructor in the first week of class. Do Not re-enter the building unless given permission by University Police, Fire department, or Fire Prevention Services.
