

Healthcare Management

SYLLABUS – Spring 2025

COURSE NUMBER	EMBA 5305
COURSE TITLE	Decision Making in Healthcare Operations Management
INSTRUCTOR	Dr. Venugopal Gopalakrishna-Remani (Dr.V)
EMAIL	venugopal@uttyler.edu
PHONE	903.565.5807
OFFICE HOURS	By Appointment
CLASS MEETINGS	Ref. EMBA Cohort Schedule

Ι. **COURSE OVERVIEW**

Effective use of quantitative analysis in operations management decisions is essential for anyone involved in the study or practice of health services administration. This text is an ideal general reference manual for healthcare professionals for decision making in operations management

CATALOG DESCRIPTION Π.

Analysis of the operations management function from a manager's perspective. Quantitative techniques related to decision making such as linear programming, statistics and selected operational models are applied to operations management problems in both the service and manufacturing industries.

III. **REQUIRED TEXT**

Analytics and Decision Support in Health Care Operations Management, 3rd Edition by Yasar A. Ozcan, Jossey-Bass/John Wiley & Sons, Inc. Also required are: Calculator capable of basic functions (adding, subtracting, multiplying, dividing, square root), Microsoft excel 2016

IV. STUDENT LEARNING OUTCOMES

- To meet the need for operations analytics and decision support in healthcare administration
- To provide practical and contemporary examples from the field
- To introduce predictive analytics for planning in healthcare facilities
- To discuss single attribute and multi attribute decision techniques often used in healthcare management decisions especially for evaluating new proposals
- To discuss staffing and resource scheduling management in healthcare facilities
- To introduce project management techniques like program evaluation and review technique and critical path method.

V. SOULES COLLEGE OF BUSINESS MISSION/CORE VALUES

Mission

The Soules College of Business pursues excellence in business education by engaging our learners, faculty, industry, and community members. We cultivate and deliver innovative undergraduate and graduate programs to foster the success of our learners and stimulate impactful faculty research. We prepare the next generation of leaders and professionals to pursue career opportunities in East Texas and beyond.

SOULES COLLEGE OF BUSINESS Executive MBA Healthcare Management

Core Values

- We value the role that business plays in recognizing, responding to, and solving societal problems: quality education, gender equality, decent work and economic growth, reduced inequality, and industry, innovation and infrastructure.
- We value existing and emerging industry standards and needs that make our learners competitive in the marketplace.
- We hold ourselves to the highest ethical standards and responsibly manage the resources of the Soules College of Business.

We respect and value diversity in ideas, peoples, and cultures.

VI. GRADING POLICY

Grade Distribution				
Assignment 1	15%			
Assignment 2	15%			
Case Studies	25%			
Class Group Projects	25%			
Group Case Studies	10%			
Pop Quizzes	10%			

Final Grades					
А	= 90% +				
В	н	80% - 89%			
С	=	70% - 79%			
D	=	60% - 69%			
F	Ш	<60%			

VII. ATTENDANCE/WEEKEND MAKE-UP POLICY

The Executive MBA Healthcare Management program is a face-to-face weekend cohort model. It is expected that executive students are present face-to-face in COB 321 on the outlined weekends. In some cases, extenuating circumstances may warrant special accommodations to be made between the student and faculty member. Students are expected to contact and receive prior approval from the faculty member.

VIII. CONTENT

Chapter 1: Introduction to Operations Analytics

Chapter 3: Decision-Making in Healthcare

Chapter 7: Staffing

Chapter 8: Scheduling

Chapter 13: Project Management

Chapter 9: Productivity and Performance Benchmarking

Chapter 2: Predictive Analytics

Executive MBA Healthcare Management

IX. CALENDAR

Week	Content	Readings	Due
1	Chapter 1:	Historical background, healthcare manager and decision	Class Group Project
	Introduction to making, importance of healthcare operations analytics, the		
	Operations Analytics	scope of healthcare services, distinctive characteristics of	
		healthcare services, gig data and data Flow	
2	Chapter 3: Decision Decision process, payoff table, decision making under		Assignment on
	Making in Healthcare	risk, decision tree, sensitivity analysis, decision tree	Decision Making
		approach Decision analysis with non-monetary values and	made available
		multiple attributes, clinical decision making and	
		implications for management	Class Group Project
3	Chapter 7: Staffing	Workload management, patient acuity systems,	Assignment due on
		development of internal workload standards, procedurally	Decision Making
		based unit staffing, acuity based unit staffing, external work	Case study 1
		standards and their adjustments,	Class Group Project
		productivity and workload arrangement	
4	Chapter 8: scheduling	Staff scheduling, surgical suite resource scheduling	Class Group Project
5	Chapter 13: Project	Characteristics of projects, planning and scheduling	Assignment on
	Management	projects, network analysis, critical path method,	Project Management
		probabilistic approach, project compression, project	made available
		time and cost, project management application in	Class Group Project
		clinical settings	
6	Chapter 9:	Meaning of Productivity, measures of productivity,	Assignment on
	Productivity and	commonly used productivity ratios, concept of multifactor	Project Management
	Performance	productivity,	due
	benchmarking	relationships with productivity and quality in healthcare	Case study 2
7	Chapter 2: Predictive	Predictive Analytics techniques, Judgmental Predictions,	
	Analytics	Time- Series Technique, techniques for averaging,	
		techniques for trend, predictive techniques for seasonality,	Class Crown Draiget
		accuracy of predictive analytics and	Class Group Project
		prediction control	Case Study 3
2	Chapter 3: Decision	Decision process, payoff table, decision making under	Assignment on
-	Making in Healthcare	risk, decision tree, sensitivity analysis, decision tree	Decision Making
		approach Decision analysis with non-monetary values and	made available
		multiple attributes, clinical decision making and	
		implications for management	Class Group Project
			Class Group Froject
