COURSE DESCRIPTION:

This course will provide the learner with an overview of major contemporary approaches to the study of human learning. The focus of the course will be the linkage between theory and educational practice. The last day to withdrawal from this course is July 27, 2021.

STUDENT LEARNING OUTCOMES:

After completion of this course, students will be able to:

1. Understand the historical development of contemporary views of human learning
2. Understand and analyze behavioral, cognitive, and social cognitive theories of learning.
3. Understand and analyze developmental perspectives on human learning
4. Apply knowledge of learning theory to the analysis of educational practices

Required Student Resources:

Textbook:

Ormrod, J.E. (2020). *Human Learning (8th Ed.)*. Pearson.

ISBN: 978-0134893662

Available from the UTT bookstore or online.

Course Policies and Expectations:

Course Environment: This is an online course that is delivered through the Canvas Learning Management System. As such, it is imperative that you check Canvas for necessary information and course materials. If you experience technical problems or have a technical question about this course, you can obtain assistance by emailing itsupport@patriots.utt Tyler.edu. When you email IT Support, be sure to include a complete description of your question or problem including: (1) the title and number of the course, (2) the page in question, (3) If you get an error message, a description and message number, and (4) what you were doing at the time you got the error message.

Written Assignments: All written assignments should be typed (double-spaced, Times New Roman, 12-point font) and submitted by midnight Central Standard Time on the due date. All written assignments should be submitted through the assignment link that I will provide. Please name written assignments using the following convention: last name, first initial, assignment title (ex. Last_F_Assignmenttitle). Assignments completed for other courses may **NOT** be turned in for this course and will be considered **academic dishonesty**.

Email: Questions and concerns about course content and assignments should be submitted to my email. I will make every effort to respond quickly to your emails. Generally speaking, I check email twice a day during the workweek and less frequently on the weekend. If my schedule makes me unavailable to answer emails for an extended period, I will try to post an announcement so that you can plan accordingly. My priority

is communicating with you and providing you with the tools needed to be successful in the course, so if there are any problems, we will work to solve them.

Late Work Policy: Late work refers to any course assignment that is submitted after the stated deadline. **Late work will be accepted in this class. However, there will be a 10% penalty for each late day.** Practically, this means that you will not receive credit for an assignment if you submit after 10 or more days. **Importantly, the late work policy does not apply to discussion board posts. Discussion board posts and replies will not be accepted after the stated deadline.**

Student Assignments & Projects:

The course is designed to be delivered in a "module format." This means that there will be a few different modules that you will work through that include their own readings, assignments, quizzes, and tests. The modules will be presented in a standardized format. The following are standard activities that will be included in the modules:

Readings: This course requires a considerable degree of independent reading to ensure that you develop content mastery. There will be two main reading requirements throughout the semester. Specifically, you will be required to read selections from the course textbook and research articles that I will assign. All research articles will be available on the Canvas site. I will also be posting supplemental readings for many of the topics that we will cover this semester. These readings are optional and are provided for those who would like to explore the course topics in more detail.

Lecture Videos: Each week, I will post short lecture videos to the Canvas site to support the development of content mastery. The topic of each lecture video(s) will be related to key concepts found within the readings for that week. The lecture video(s) for each topic will be available on the Canvas site each Monday morning beginning at 9:00 am Central Standard Time.

Quizzes: There will be several short quizzes in the semester (roughly one per topic). These will be delivered online and will serve to provide a check of your understanding. You will be able to take each quiz twice. The highest score will be kept.

Self-Reflections. Research shows that metacognition (the ability to reflect on study success and make changes) is critical for success in college. As such, I will be asking you to complete several low-stakes reflections designed to increase metacognitive ability. I will provide information about these assignments later in the semester.

Traditional Discussion Board: During the first week of the course, you will complete a traditional discussion board. Specifically, you will introduce yourself and share any questions/concerns you have about the course.

Synchronous Zoom Group Discussions: You will participate in several synchronous group discussions this semester. During these meetings, you will discuss course content

and how the information can be applied within the classroom. I will provide prompts to help guide your discussion. During the first week of the course, I will ask everyone to share their availability and I will use this information to create discussion groups.

Learning Reflection Assignments: There are also in-depth written assignments (these are called "Learning Reflection Assignments"). These assignments are used to ensure that you can analyze, summarize, and apply the theories in each module. These will be outlined in more detail but are generally short analysis and reflection papers that require the *explanation and application* of specific theories, personal philosophy statements and defenses for theories of learning and motivation (EX: “what do YOU believe...why? Who agrees with you from the field?”).

Research Pool Requirement: Students must fulfill a research pool requirement. The research requirement for these courses can be satisfied in one of two ways. First, students can fulfill the research pool requirement by volunteering to participate in approved research studies offered by the School of Education. Alternatively, students can satisfy the research pool requirement by completing alternative assignments that are equal in time and effort to the research opportunities. Detailed information about the research requirement can be found on the CANVAS page for the course.

Due Date: Unless stated otherwise, all assignments are due before 11:59 pm on Sunday, the week that they appear on the course schedule. Stated another way, each week’s assignments are due before Midnight on Sunday.

Grade Item	% of final grade	Total Points
Quizzes	37.5%	10 quizzes x 30 points per quiz = 300 total points
Learning Reflection Assignments	37.5%	3 LRAs X 100 points each = 300 points total
Discussion Board Posts	18.75%	6 DBs x 25 points per post = 150 points total
Self-Reflection Assignments	3.125%	2 reflections x 12.5 points per reflection = 25 points total
Research Requirement	3.125%	25 points
Course Total		800 points

Please note: The number, content focus, and point value of all assessments and assignments is an approximation and may change.

Letter Grades: Letter grades will be assigned using the following guidelines:

A: 90.00% of points or above, B: 80.00% -89.999% of points, C: 70.00% - 79.999% of points, D: 60.00% -69.999% of points, F: 59.999% of points or below

COLLEGE OF EDUCATION AND PSYCHOLOGY (CEP) VISION AND MISSION

Vision: The College of Education and Psychology is nationally recognized and respected for its academic programs and opportunities. It is a center of academic excellence, scholarly inquiry, and public service. The College prepares leaders to meet the critical challenges of the 21st Century through productive contributions to local and global communities and toward individual and cultural equity.

Mission: The mission of the College of Education and Psychology is to provide a positive environment that fosters the acquisition of knowledge and skills. The mission is individually and collectively realized through a community of scholars that contributes to knowledge through scholarly inquiry; organizes knowledge for application, understanding and communication; and provides leadership and service. We affirm and promote global perspectives that value individual and cultural diversity to enhance learning, service, and scholarship.

UT TYLER'S SCHOOL OF EDUCATION STANDARDS FOR EDUCATOR PREPARATION PROGRAMS

Texas Education Standards: The School of Education are committed to teaching and implementing the Texas Educator Standards at the highest level. The School of Education faculty use the Texas Education Standards, along with the Interstate New Teacher Assessment and Support Consortium (InTASC) standards used by educator preparation programs throughout the United States.
