

CHEN-2310 (2024-FALL) 001

[Jump to Today](#) Edit

Fall 2024

MEMORANDUM FOR STUDENTS ENROLLED IN CHEN 2310 – Section 01

SUBJECT: CHEN 2310 Introduction to Chemical Engineering Administrative Instructions

Lecture times: MWF, 11:15 am -12:10 pm

Location: RBN 1007

Office hours: Tu/F, 1:00 pm - 2:30 pm

Instructor: Fernando Resende, office RBN 2043/2045

E-mail: fresende@uttyler.edu

Phone: 903-565-6538

Welcome to CHEN 2310 - Introduction to Chemical Engineering. This course provides the basis and the key principles that you will need as you advance to your career as a chemical engineer. Industries, careers, and the curriculum are discussed. Basic chemical engineering terms, concepts, and calculations are presented. Mass balance calculations are performed around unit operations or groups of unit operations in Chemical Processes. Calculations will be related to practical examples in the chemical industry. Students taking this course should develop the ability to apply the conservation laws to calculate flow rates and chemical composition of non-reactive and reactive systems containing multiphase streams. These may include solid, liquid, and gaseous components.

The course has one prerequisite which must be completed successfully prior to taking this course:

- CHEM 1311 (General Chemistry I)

In addition, the course has one co-requisite:

- CHEN 1312 (General Chemistry II)

The goal of our faculty is to be commonly available to you for assistance, so you are encouraged and expected to seek **additional instruction**. Take advantage of it, it is FREE and really will help! There are several ways you can seek help:

- You are welcome to stop by the instructor's office at any time. However, for your own satisfaction, you can ensure the instructor is available at the office by using the following options:
- Come to Office hours. This is the time the instructor has set aside to answer your questions.
- E-mail or call the instructor to set up a mutually agreeable time to meet with the instructor,
- E-mail your questions to the instructor (this is the least preferred option because of the limited effectiveness of e-mail communication), but it is acceptable if other options are not possible.

Use of Artificial Intelligence (AI):

I expect all work students submit for this course to be their own. I have carefully designed all assignments and class activities to support your learning. Doing your own work, without human or artificial intelligence assistance, is best for your efforts in mastering course learning objectives. For this course, ***I expressly forbid using ChatGPT or any other generative artificial intelligence (AI) tools for any stages of the work process, including brainstorming.*** Deviations from these guidelines will be considered a violation of UT Tyler's Honor Code and academic honesty values.

Mode of delivery: This is a face-to-face course.

1. Course Objectives:

1. Discuss the basic career paths for a chemical engineer.
2. Demonstrate critical thinking in problem solving by applying one or more problem solving techniques in order to reach a solution.

3. Apply mass balance laws to calculate flow rates and compositions of streams in complex engineering process.
4. Apply basic laws such as the ideal gas law and Raoult's law to solve fundamental chemical engineering problems.
5. Communicate effectively using appropriate written, oral and graphical methods such as spreadsheets, engineering drawings and well-organized engineering calculations.

2. Recording of Class Sessions

Class sessions will be recorded by the instructor for use by students in community colleges. Recordings that contain personally identifiable information or other information subject to FERPA shall not be shared with individuals not enrolled in this course unless appropriate consent is obtained from all relevant students. Class recordings are reserved only for the use of students enrolled in the course and only for educational purposes. Course recordings should not be shared outside of the course in any form without express permission.

3. Class Room Procedures:

1. Bring study notes, **textbooks**, note-taking material, and calculator to every class. You may not borrow or exchange calculators during graded events. If your calculator fails during a graded exercise, I am not responsible to furnish a substitute. Class preparation is your individual responsibility.
2. *Textbook:*

-

Richard Felder, Ronald Rousseau, & Lisa Bullard; Elementary Principles of Chemical Processes, John Wiley & Sons, New York, 2015, 4th Edition. (F&R)

-

1. *Recitations:*

Certain lectures will be used for recitation sessions. These will be the students' opportunity to practice problem-solving skills applying the concepts learned in lectures.

These skills will be needed for solving homework, quizzes and exam problems. Please bring your textbook for the recitation sessions.

4. Evaluations:

1. *ACADEMIC DISHONESTY*: Representation of other's work as your own will not be tolerated. Cheating on examinations, quizzes, and homework and the false representation of work will be interpreted as academic dishonesty. Academic dishonesty will be subject to disciplinary action as outlined by the UT Tyler Student Guide on Conduct and Discipline.

1. *Homeworks*: A set of homework problems will be assigned approximately every two weeks (there will be eight homework assignments during the semester). All homework is mandatory and becomes part of your grade. As an engineer, your goal is to make a clear, logical, and professional presentation of your work, which is both accurate and correct. As such, both the presentation and the accuracy of your work are important, and both will be graded. It is critical that you show all of your work and leave "foot prints" so that it can be easily followed. No guess work should be required to see what you did. For each homework problem, the corresponding topic and numerical answers will be provided. You are encouraged to work in groups, but the work that you turn in should be your own. Homeworks are *due* at the beginning of class, and they must be submitted online via Canvas.

1. *Open-ended projects*: At several points in the semester, students will be required to work on Open-Ended projects. Open-Ended projects are characterized for not having a unique, single answer/solution. Instead, they are creativity exercises in which you are encouraged to apply the concepts learned in the course. They may be qualitative or quantitative. In either case, make sure your answer is clear and detailed, because you will be evaluated by the approach and thought process you use in these exercises. Open-Ended projects will be graded as follows:

4.0 pts – Solution is creative, complete, and makes excellent use of the concepts learned in class.

3.0 pts – Solution is complete or almost complete. It effectively applies the concepts learned in class, though it may contain one or more minor errors.

2.0 pt – Solution is partially complete. It attempts to apply concepts learned in class, but it contains one or more major errors.

1.0 pt – Presents an attempt to the Open-Ended project that is incomplete and does not properly apply the concepts learned in class.

0.0 pts – Solution is poor or suggests unethical/unprofessional actions.

You are encouraged to work in groups, but the work that you turn in should be your own. Turning in the same solution to the Open-Ended project as another student will be considered plagiarism. Open-Ended projects must be submitted online via Canvas, and must be presented in a professional manner. Along these lines, **submissions need to be typed**. Handwritten work for Open-Ended projects will not be accepted.

1. *Ratliff Relays*: All the students in the College of Engineering will participate in a “hands-on” project, which will consist of a group competition in late October. As part of the activities of this course, CHEN 2310 students will participate in a “CO₂ Bottle Rocket” competition (competing against groups of Chem Eng juniors and seniors). The purpose of this competition is two-fold: (1) to provide students the opportunity to wrestle with an open-ended, practical engineering problem, and (2) to increase awareness of STEM Challenges across the state of Texas. The competition focuses on four distinct aspects: (1) creating an innovative solution to a wastewater treatment problem, (2) authoring a technical report describing the project management, design, engineering, and construction of the treatment solution, (3) delivering a video oral report relaying technical and management information regarding the project, and (4) physically testing the solution and displaying the elements to be judged. The bulk of the activities that form the competition are analogues of the realworld skills that practicing engineers and project managers in the new millennium must possess. Student teams will consist of 4 or 5 students, who will be responsible for answering questions during the Oral Presentation. Each team shall designate a registered participant as their team captain. Additional details about the Ratliff Relays will be made available in a separate document.

1. *Late Submissions*. It is a basic principle of professionalism that “**Professionals are not Late.**” A “COORDINATED LATE” submission occurs when you will miss the due date for a graded assignment and you contact me in advance. Notification immediately before the submission will not suffice.

Point cuts up to the amounts below may be assessed for a “COORDINATED LATE” submission:

1. 0-24 hours late a deduction of 25% of the earned grade
2. 24-48 hours late a deduction of 50% of the earned grade
3. More than 48 hours late No credit.

-
Obviously there are circumstances that will occur and make a timely submission impossible and I will work with you when and if they occur.

All homework and open-ended projects in this course must be properly documented. As you are having your work reviewed, it is likely that you might receive help from your classmates, just simply document it. Information from the course textbooks (equations and outlines of procedures), class notes, or me is considered immediately available to all students and need not be acknowledged or documented with one exception. **YOU ARE REQUIRED TO ACKNOWLEDGE AND DOCUMENT ALL OTHER ASSISTANCE AND REFERENCES USED.** Documentation will be accomplished in accordance with any manual for writing, footnote or endnote, for papers, but for written homework, just place the documentation right at the point you received help using “Who and what” assistance.

1. *Quizzes*: There will be four quizzes on scheduled dates during the semester. **Quizzes will only include problems from previous homework assignments and/or recitations** (numerical values may be modified).
2. *Participation grade*: Students are expected to be engaged in class and outside of the class. The instructor will assign a participation grade to each student based on the following observations:
 - Attendance in class and punctuality;
 - Level of participation in class, asking questions about the material and answering questions from the instructor;
 - Engagement in recitation sessions, demonstrating initiative to work on problems, and actively participating in the discussions;
 - Asking questions outside class: after class, during office hours, and by e-mail.

Attendance in class is the component with more weight on participation. A student that attends every class, but otherwise is not active will receive a 3.0/6.0 as participation grade.

1. Mid-Term Exams and Final Exam:

There will be one Midterm Exam and one Final exam. The Midterm will be fifty-five minutes long, and the Final will be two hours long. The dates for Exams are included in the course schedule. Official reasons for missing an exam are outlined in the "Student Handbook". You are required to take a make-up Exam, regardless of your reason for missing the scheduled Exam. Report any conflict to me as soon as possible prior to the Exam. You can use a **TI-30 calculator** (or FE equivalent), and ***an equation sheet will be provided by the instructor.***

5. Grading:

Grades will be based entirely on the student's demonstrated ability to develop detailed, neat, organized, and correct solutions to the problems presented. Correct answers accompanied by incorrect, incomplete, or untidy solutions may receive no credit.

Course Points

Quizzes (4 at 4.0 points each)	16 (16 %)
Homeworks (8 at 2.0 points each)	16 (16 %)
Open-ended projects (4 at 4.0 points each)	16 (16 %)
Ratliff Relays	16 (16 %)
Participation (1 at 4.0 points) %)	4 (4
Midterm Exam (1 at 16 points)	16 (16%)
Final Examination (1 at 16 points)	16 (16%)
Total	100 (100%)

Grade Scale based on points

85.0 points or higher	A	
Between 70.0 and 84.0		B
<i>Between 60.0 points and 69.9</i>		C
Between 30.0 and 59.9 points		D
Less than 30.0 points		F

You need at least 60 points total to pass the course with a C grade. You need to be at the class average to receive a B grade.

6. Collection of Student Work:

Throughout the semester I will collect student work (best, average, and worst) for the ABET course and outcomes notebooks. This will require me to make a copy of your work, keep your original and return a copy of the graded work to you. I will not draw attention as to what level of work you accomplished.

7. Assigned readings:

The class schedule will include assigned reading for every lecture. Students who read the corresponding sections of the book *before each class* will certainly make the most of the lectures, so this is highly recommended. In addition, the instructor will periodically post the lecture notes on the course website. Doing the assigned reading prior to class will help you to understand the material presented during the instruction and will fill in gaps for things we do not cover (***I will not cover everything***). It will also make you more familiar with terms and concepts to be covered.

8. **UT Tyler Honor Code** - Every member of the UT Tyler community joins together to embrace: Honor and integrity that will not allow me to lie, cheat, or steal, nor to accept the actions of those who do.

9. **Students Rights and Responsibilities:** to know and understand the policies that affect your rights and responsibilities as a student at UT Tyler, please follow this link: <http://www.uttyler.edu/wellness/rightsresponsibilities.php>Links to an external site..

10. **Campus Carry** - We respect the right and privacy of students 21 and over who are duly licensed to carry concealed weapons in this class. License holders are expected to behave responsibly and keep a handgun secure and concealed. More information is available at <http://www.uttyler.edu/about/campus-carry/index.php>Links to an external site..

11. **UT Tyler a Tobacco-Free University** - All forms of tobacco will not be permitted on the UT Tyler main campus, branch campuses, and any property owned by UT Tyler. This applies to all members of the University community, including students, faculty, staff, University affiliates, contractors, and visitors. Forms of tobacco not permitted include cigarettes, cigars, pipes, water pipes (hookah), bidis, kreteks, electronic cigarettes, smokeless tobacco, snuff, chewing tobacco, and all other tobacco products. There are several cessation programs available to students looking to quit smoking, including counseling, quitlines, and group support. For more information on cessation programs please visit uttyler.edu/tobacco-freeLinks to an external site..

12. **Grade Replacement/Forgiveness and Census Date Policies** - Students repeating a course for grade forgiveness (grade replacement) must file a Grade Replacement Contract with the Enrollment Services Center (ADM 230) on or before the Census Date of the semester in which the course will be repeated. Grade Replacement Contracts are available in the Enrollment Services Center or at <http://www.uttyler.edu/registrar>. Each semester's Census Date can be found on the Contract itself, on the Academic Calendar, or in the information pamphlets published each semester by the Office of the Registrar. Failure to file a Grade Replacement Contract will result in both the original and repeated grade being used to calculate your overall grade point average. Undergraduates are eligible to exercise grade replacement for only three course repeats during their career at UT Tyler; graduates are eligible for two grade replacements. Full policy details are printed on each Grade Replacement

Contract. The Census Date is the deadline for many forms and enrollment actions of which students need to be aware. These include:

- Submitting Grade Replacement Contracts, Transient Forms, requests to withhold directory information, approvals for taking courses as Audit, Pass/Fail or Credit/No Credit.
- Receiving 100% refunds for partial withdrawals. (There is no refund for these after the Census Date)
- Schedule adjustments (section changes, adding a new class, dropping without a "W" grade)
- Being reinstated or re-enrolled in classes after being dropped for non-payment
- Completing the process for tuition exemptions or waivers through Financial Aid

13. State-Mandated Course Drop Policy - Texas law prohibits a student who began college for the first time in Fall 2007 or thereafter from dropping more than six courses during their entire undergraduate career. This includes courses dropped at another 2-year or 4-year Texas public college or university. For purposes of this rule, a dropped course is any course that is dropped after the census date (See Academic Calendar for the specific date). Exceptions to the 6-drop rule may be found in the catalog. Petitions for exemptions must be submitted to the Enrollment Services Center and must be accompanied by documentation of the extenuating circumstance. Please contact the Enrollment Services Center if you have any questions.

14. Disability/Accessibility Services - In accordance with Section 504 of the Rehabilitation Act, Americans with Disabilities Act (ADA) and the ADA Amendments Act (ADAAA) the University of Texas at Tyler offers accommodations to students with learning, physical and/or psychological disabilities. If you have a disability, including a non-visible diagnosis such as a learning disorder, chronic illness, TBI, PTSD, ADHD, or you have a history of modifications or accommodations in a previous educational environment, you are encouraged to visit <https://hood.accessiblelearning.com/UTTyler> and fill out the New Student application. The Student Accessibility and Resources (SAR) office will contact you when your application has been submitted and an appointment with Cynthia Lowery, Assistant Director of Student Services/ADA Coordinator. For more information, including filling out an application for services, please visit the SAR webpage at <http://www.uttyler.edu/disabilityservices>, the SAR office located in the University Center, # 3150 or call 903.566.7079.

15. Student Absence due to Religious Observance - Students who anticipate being absent from class due to a religious observance are requested to inform the instructor of such absences by the second class meeting of the semester.

16. Student Absence for University-Sponsored Events and Activities - Revised 05/19 If you intend to be absent for a university-sponsored event or activity, you (or the event sponsor) must notify the instructor at least two weeks prior to the date of the planned absence. At that time the instructor will set a date and time when make-up assignments will be completed.

17. Social Security and FERPA Statement - It is the policy of The University of Texas at Tyler to protect the confidential nature of social security numbers. The University has changed its computer programming so that all students have an identification number. The electronic transmission of grades (e.g., via e-mail) risks violation of the Family Educational Rights and Privacy Act; grades will not be transmitted electronically.

18. Emergency Exits and Evacuation - Everyone is required to exit the building when a fire alarm goes off. Follow your instructor's directions regarding the appropriate exit. If you require assistance during an evacuation, inform your instructor in the first week of class. Do not re-enter the building unless given permission by University Police, Fire department, or Fire Prevention Services.

19. Student Standards of Academic Conduct - Disciplinary proceedings may be initiated against any student who engages in scholastic dishonesty, including, but not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts.

20. "Cheating" includes, but is not limited to:

- copying from another student's test paper;
- using, during a test, materials not authorized by the person giving the test;
- failure to comply with instructions given by the person administering the test;

- possession during a test of materials which are not authorized by the person giving the test, such as class notes or specifically designed “crib notes”. The presence of textbooks constitutes a violation if they have been specifically prohibited by the person administering the test;
 - using, buying, stealing, transporting, or soliciting in whole or part the contents of an unadministered test, test key, homework solution, or computer program;
 - collaborating with or seeking aid from another student during a test or other assignment without authority;
 - discussing the contents of an examination with another student who will take the examination;
 - divulging the contents of an examination, for the purpose of preserving questions for use by another, when the instructor has designated that the examination is not to be removed from the examination room or not to be returned or to be kept by the student;
 - substituting for another person, or permitting another person to substitute for oneself to take a course, a test, or any course-related assignment;
 - paying or offering money or other valuable thing to, or coercing another person to obtain an unadministered test, test key, homework solution, or computer program or information about an unadministered test, test key, home solution or computer program;
 - falsifying research data, laboratory reports, and/or other academic work offered for credit;
 - taking, keeping, misplacing, or damaging the property of The University of Texas at Tyler, or of another, if the student knows or reasonably should know that an unfair academic advantage would be gained by such conduct; and
 - misrepresenting facts, including providing false grades or resumes, for the purpose of obtaining an academic or financial benefit or injuring another student academically or financially.
1. “Plagiarism” includes, but is not limited to, the appropriation, buying, receiving as a gift, or obtaining by any means another’s work and the submission of it as one’s own academic work offered for credit.
 2. “Collusion” includes, but is not limited to, the unauthorized collaboration with another person in preparing academic assignments offered for credit or collaboration with another person to commit a violation of any section of the rules on scholastic dishonesty.
 3. All written work that is submitted will be subject to review by plagiarism software.

20. UT Tyler Resources for Students

- UT Tyler Writing Center (903.565.5995), writingcenter@uttyler.edu
- UT Tyler Tutoring Center (903.565.5964), tutoring@uttyler.edu
- The Mathematics Learning Center, RBN 4021, this is the open access computer lab for math students, with tutors on duty to assist students who are enrolled in early-career courses.
- UT Tyler Counseling Center (903.566.7254)

Schedule:

Important dates for the Fall Special are highlighted in green.

week	August	Material	Assigned Reading	Evaluation due
	M 26	Syllabus, What is Chemical Engineering?	-	-
1	W 28	Ratliff Relays Discussion - Group Assignments		-
	F 30	No class - visit to Eastman	-	-
	September	Material	Assigned Reading	Evaluation due
	M 2	No class - Labor day		-
2	W 4	History and Careers in Chemical Engineering	F& R Chapter 1	HW 1
	F 6	Basics of Eng. Calculations	2.7	-
3	M 9	Recitation 1, Process Data Analysis	F & R 3.0 - 3.2	-

	W	11	Process Data Analysis - mass, volume, flow rates	F & R 3.0 - 3.3	-
	F	13	-	-	HW 2, Quiz 1
	M	16	Process variables - composition	F & R 3.0 - 3.3	HW 2, Quiz 1
4	W	18	Process variables - pressure	F & R 3.4	Open-ended project 1
	F	20	Recitation 2		Preliminary Design / Parts list for Ratliff Rrelays
	M	23	Process Classification, Basics of Material Balances	F&R 4.0 - 4.2	-
5	W	25	Basics of Materials balances, Degree-of-freedom Analysis	F&R 4.0 - 4.2	HW 3
	F	27	Balances on singles units	F&R 4.3	-
6	M	30	Recitation 3	F&R 4.5	Submission of Ratliff Relays video
	October		Material	Assigned Reading	Evaluation due
	W	2	-	-	HW 4, Quiz 2
6	F	4	Balances on multiple units	F&R 4.5	Open-ended project 2
	M	7	Examples on multiple-unit processes	F&R 4.5	-
7	W	9	Examples on multiple-unit processes	F&R 4.5	-

	F	11	-	-	Midterm Exam
	M	14	Stoichiometry, Equilibrium	F&R 4.5	-
	W	16	Recitation 4	F&R 4.6	-
8	F	18	Multiple Reactions	F&R 4.6	-
	S	19	Ratliff Relays- CO ₂ Rocket Bottle	-	-
	M	21	Multiple Reactions	-	-
9	W	23	Balances on Reactive Systems	F&R 4.7	HW 5
	F	25	Recycle reactors	F&R 4.7	-
10	M	28	No class - AIChE conference	-	-
	W	30	Recycle reactors - example		-
		November	Material	Assigned Reading	Evaluation due
10	F	1	Recycle reactors - example		-
	M	4	Recitation 5		HW 6, Quiz 3
11	W	6	Ideal gas law	F&R 5.1 – 5.2	-
	F	8	Ideal gas law mixtures	F&R 5.3 – 5.4	HW 6, Quiz 3
12	M	11	The law of corresponding states, mixtures	-	Open-ended project 3

	W	13	Recitation 6	-	-
	F	15	Single component phase equilibrium, vapor pressure	F&R 6.0 - 6.1	-
	M	18	Vapor-liquid with 1 condensable component	-	-
13	W	20	Vapor-liquid with multiple condensable components	-	HW 7
	F	22	Equilibrium, Multiphase mixtures	F&R 6.4	-
	M	25	Thanksgiving - no classes	-	-
14	W	27	Thanksgiving - no classes	-	-
	F	29	Thanksgiving - no classes	-	-
			December Material	Assigned Reading	Evaluation due
	M	2	Recitation 7	-	-
15	W	4	Equilibrium, Multiphase mixtures	F&R 6.4	-
	F	6	-	-	HW 8, Quiz 4

Open-Ended Project 4 - TBA

Final Exam - TBA
