
HPEM 5360 Quality Improvement and Efficacy in Health Credit Hours: 3

Semester: Fall **Year:** 2022
Class Days/Times: Mon; 6:00 – 9:00 pm **Class Location:** Online
Synchronous classes when scheduled

Instructor of Record: Michael H. Kennedy, PhD, MHA, FACHE Associate Professor
Lean Six Sigma Green Belt in Healthcare
Office: H241
Office Phone: (903) 877-1402
E-Mail: mkennedy@uttyler.edu
Office Hours: By appointment. Email me or call to request a time to meet.

Course Description: This course will develop the foundations of quality and process improvement that lead to higher levels of efficacy, efficiency and effectiveness in health organizations and programs. This course will explore the basis of Quality Improvement (QI) consisting of systematic and continuous actions that lead to measurable improvement in health care services and the health status of targeted patient groups. The methodology of the course will begin with “how things are done now,” considering health care performance as defined by an organization's efficiency and outcome of care, and level of patient satisfaction. Quality is directly linked to an organization's service delivery approach or underlying systems of care throughout the continuum of care. The student will understand that to achieve a different level of performance (i.e., results) and improve quality and efficacy, an organization's current system needs to change. Lastly, this course will focus on a successful QI culture that incorporates the following four key principles: QI work as systems and processes; focus on patients and community groups, especially rural areas; focus on being part of the team; and focus on use of the data and analyses of information.

Prerequisite: None.

Co-requisite: None

Student Learning Outcomes (SLO or “course objective”): Upon successfully completing this course, the student will be able to:

1. Describe the evolution of health care quality improvement. [PLOs 1.4 and 2.4; A.2 and A.8]
2. Employ process analysis tools to examine and improve health care operations. [PLOs 2.2 and 5.3; A.1, A.3, A.5, and A.8]
3. Employ Lean tools. [PLOs 2.2 and 5.3; A.1, A.3, A.5, and A.8]
4. Build and interpret statistical process control charts. [PLOs 2.2 and 5.3; A.1, A.3, A.5, & A.8]
5. Determine process capability. [PLOs 2.2 and 5.3; A.1, A.3, A.5, and A.8]
6. Explain DMAIC as a problem-solving approach within the context of Lean Six Sigma. [PLOs 2.2; A.2 and A.8]
7. Trace the natural flow of patients through a health care practice using Visio. [PLOs 2.2 and 5.1 – 5.3; A.3, A.5, and A.8]
8. Build a value stream map. [PLOs 2.2 and 3; A.1, A.3, A.5, and A.8; B.1, B.2 and B.3]
9. Develop an action plan to improve patient flow. [PLOs 4 and 6; A.10, B.1, B.2 and B.3]

Course Assessment/Methods of Evaluation:

| Assignments ¹ | Points | Percentage |
|--|--------|------------|
| Project: Value Stream Mapping Project | 100 | 20% |
| Exam 1 | 100 | 20% |
| Exam 2 | 100 | 20% |
| HW 1: Article Review | 10 | 2% |
| HW 2: Process Analysis Tools (Part 1) | 15 | 3% |
| HW 3: Process Analysis Tools (Part 2) | 15 | 3% |
| HW 4: Process Analysis Tools (Part 3) | 15 | 3% |
| HW 5: Determining Distribution Shapes | 15 | 3% |
| HW 6: Process Capability | 15 | 3% |
| HW 7: Control Charts (I-MR) | 15 | 3% |
| HW 8: Control Charts (Xbar-R) | 15 | 3% |
| HW 9: Control Charts (p, np, c) | 15 | 3% |
| LSS Green Belt in Health Care Review Exam I | 15 | 3% |
| LSS Green Belt in Health Care Review Exam II | 15 | 3% |
| Participation Exercises (Gemba Walk, 5 S, Red Ball, Standard Work) | 40 | 8% |
| Total | 500 | 100% |

¹ Assignments are due on Monday by 4:00 pm following the week of assignment, unless otherwise noted. Late assignments will not be accepted.

Course Grade Scale (points): A: 450 to 500, B: 400 to 449, C: 350 to 399, F: < 350 points

Linked MPH Program Learning Outcomes:

The student learning outcomes listed above address the following MPH Program PLOs:

- PLO1 - The student will demonstrate mastery in each of the five core knowledge areas in public health: Biostatistics, Epidemiology, Social & Behavioral Sciences, Health Policy and Management, and Environmental Health Sciences.
- PLO2 - The student will demonstrate proficiency in the four core functions of public health, as well as be able to explain the principles and interrelatedness of the ten essential public health services.
- PLO3 - The student will demonstrate proficiency in using multiple informational resources to gather, analyze, apply and report solutions to public health problems with a special emphasis on rural community health.
- PLO4 - The student will demonstrate proficiency in English communication in both oral (public speaking) and written forms as they pertain to conveying key concepts in public health.
- PLO5 - The student will demonstrate proficiency in using computers and other forms of digital technology and media as they pertain to research, office management and public health issues.
- PLO6 - The student will demonstrate independent and critical thinking skills.

Linked MHA Program Learning Outcomes:

The student learning outcomes listed on pp. 1 and 2 address the following MHA Program PLOs:

- PLO A.1 - The student will identify appropriate sources and gather information, effectively and efficiently.
- PLO A.2 - The student will appraise literature and data critically that enhances community health.
- PLO A.3 - The student will develop, understand, and use data from performance, surveillance or monitoring systems.
- PLO A.5 - The student will understand and apply basic statistical methods relevant to public health and health administration practice.
- PLO A.8 - The student will analyze, design, or improve an organizational process, including the use of quality management, process improvement, marketing and information technology principles and tools.
- PLO A.10 - The student will implement a decision-making process that incorporates evidence from a broad analysis that includes uncertainty, risk, stakeholders, and organizational values.
- PLO B.1 - The student will speak and write in a clear, logical, and grammatical manner in formal and informal situations; prepare cogent business presentations; facilitate an effective group process.
- PLO B.2 - The student will receive, process, and respond appropriately to information conveyed by others.
- PLO B.3 - The student will perceive and respond appropriately to the spoken, unspoken, or partly expressed thoughts, feelings, and concerns of others.

Recommended Textbooks:

Brook, Q. (2020). *Lean Six Sigma & Minitab: The complete toolbox guide for business improvement*, 6th ed. Hampshire, UK: OPEX Resources.

Ross, Thomas K. (2014). *Health care quality management: Tools and Applications*. San Francisco, CA: Jossey-Bass.

Supplemental Text:

Ross, Thomas K. (2021). *Applying Lean Six Sigma in health care*. Burlington, MA: Jones & Bartlett Learning.

Other Required Readings: As assigned.

Instructor's Note – Ross (2014) was used to build the initial foundation of the course. As I integrated Lean Six Sigma, I added the Brook (2020) as a Lean Six Sigma “cookbook”; the structure of the text walks you through the **D**efine → **M**easure → **A**nalyze → **I**mprove → **C**ontrol steps of DMAIC similarly to set of recipes for a five-course meal. Since it is intended as a guide, content and context are sometimes missing. Throughout this semester, I will be adding both from Dr. Ross's most recent publication.

I've always been a “book guy.” All three of these books are good professional references if you are looking to build a reference library about quality.

Course Content:

| Schedule | Assigned Readings |

Lean Six Sigma Green Belt for Healthcare Exam

Students taking this course will be eligible to sit for the Institute of Industrial and Systems Engineers Lean Six Sigma Green Belt for Healthcare Certification Exam.

Contact the Instructor regarding examination requirements and fees if you wish to take the Lean Six Sigma Green Belt for Healthcare Certification Exam.

Students taking the Lean Six Sigma Green Belt for Healthcare Certification Exam have the option of substituting that score for Exam 2. Take the Lean Six Sigma Green Belt for Healthcare Exam prior to 11:00 pm, December 8 If you want the result to substitute for Exam 2

Additional resources to help you prepare for the Lean Six Sigma Green Belt in Healthcare Exam are available in a module at the end of the course materials

Other Class Policies (Refer to University Policies & Information posted to Canvas for Complete Listing)

Attendance:

Regular attendance is highly recommended. If a student misses a class or lab, the student is responsible for obtaining any information distributed during those times.

COVID:

It is important to take the necessary precautions to ensure a healthy and successful year. UT Tyler continues to urge you to protect yourselves against the flu, COVID and any new threats that may be developing. Be diligent about preventive measures such as washing hands, covering sneezes/coughs, social distancing and vaccinations, which have proven to be successful in slowing the spread of viruses. Encourage those who don't feel well to stay home, and if they show symptoms, ask them to get tested for the flu or COVID. Self-isolation is important to reduce exposure ([CDC quarantine/isolation guidelines](#)). Please work with your faculty members to maintain coursework and please consult [existing campus resources](#) for support.

Participation:

Attendance and participation in class is important. Students will be frequently asked to review concepts and online presentations prior to the scheduled class, so that class time can be used for hands-on activities and work on assignments. Students will often be building Excel and JMP models with the Instructor.

Academic Honesty:

Any student who commits an act of scholastic dishonesty is subject to discipline. Scholastic dishonesty includes, but is not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts.

Cheating

Dishonesty of any kind involving examinations, assignments, alteration of records, wrongful possession of examinations, and unpermitted submission of duplicate papers for multiple classes or unauthorized use of keys to examinations is considered cheating. Cheating includes but is not limited to:

- Using or attempting to use unauthorized materials to aid in achieving a better grade on a component of a class.
- Falsifying or inventing any information, including citations, on an assigned exercise.
- Helping or attempting to help another in an act of cheating or plagiarism.

Plagiarism

Plagiarism is presenting the words or ideas of another person as if they were your own. Materials, even ideas, borrowed from others necessitate full and complete acknowledgment of the original authors. Offering the work of another as one's own is plagiarism and is unacceptable in the academic community. A lack of adequate recognition constitutes plagiarism, whether it utilizes a few sentences, whole paragraphs, articles, books, audio-visual materials, or even the writing of a fellow student. In addition, the presentation of material gathered, assembled, or formatted by others as one's own is also plagiarism. Because the university takes such misconduct very seriously, the student is urged to carefully read university policies on Misconduct in Research and Other Scholarly Activity 05.00. Examples of plagiarism are:

- Submitting an assignment as if it were one's own work when, in fact, it is at least partly the work of another.
- Submitting a work that has been purchased or otherwise obtained from an Internet source or another source.
- Incorporating the words or ideas of an author into one's paper without giving the author due credit

Withdrawing from Class:

See University Policies & Information posted to Canvas.

Disability Accommodations:

See University Policies & Information posted to Canvas.
