

PHAR 7192: Non-Sterile Compounding

Spring Semester 2025

Course Description

Introduction to the science and practice of non-sterile pharmaceutical compounding.

Additional Course Description

This practical laboratory course offers an insight into the interrelationships between the physical and chemical aspects of compounding. Students will develop compounding skills that are used for the most common types of non-sterile preparations, employing standards of good compounding practices.

Course Credit

1 credit hour

Fisch College of Pharmacy (FCOP) and UT Tyler Policies

This is part 1 of the syllabus. Part 2 contains UT Tyler and the FCOP course policies and procedures. These are available as a PDF at <https://www.uttyler.edu/pharmacy/academic-affairs/>. For experiential courses (i.e., IPPE and/or APPE), the Experiential Manual contains additional policies and instructions that supplement the Syllabus Part 1 and 2. Please note, the experiential manual may contain policies with different deadlines and/or instructions. The manual should be followed in these cases.

Course Format

The course may include, but are not limited to, the following activities:

1. Recitation (Pre-lab and review of calculations)
2. Extemporaneous compounding of pharmaceutical preparations.

Course Learning Outcomes (CLOs)

CLOs	Related PLO(s)	Assessment Methods	Grading Method	JCPP Skill(s) Assessed	ACPE Std. 11 & 12
1. Demonstrate skills in extemporaneous compounding of selected liquid, semisolid, and solid pharmaceutical preparations.	1	1, 2	RUB	NA	NA
2. Demonstrate skills in solving numerical problems related to nonsterile compounding	1	2	ES, Paper-based	NA	NA

Course Assessment Methods

	Assessment Method	Description
1	Each product compounded by the students will be evaluated.	Rubric (RUB) – presented below
2	Multiple Choice or Multiple Selection or fill in the blank Question(s), paper-based calculations.	Standard MCQ, Select All that apply questions, and fill in the blank question(s) in ExamSoft (ES), paper-based exam.

Grading Policy & Grade Calculation

Recitation (50% of the grade)

Quiz	10%
Midterm	15%
Final (Cumulative)	25%

<u>Lab work</u> **	50%
--------------------	-----

Students must pass recitation and lab work separately, i.e. the student must receive a score of 70% or higher in the recitation and a 70% or higher in the lab to pass this course. If a student receives less than 70% in either the recitation or the lab, they will receive a D or F in the course. For example, if a student receives 80% in laboratory and 64% in recitation, they will receive a final grade of F. If the student receives 80% in the laboratory and 66% in the recitation, the student will receive a final grade of D.

**Each product compounded by the students will be graded based on the accuracy of calculations, methods, product's quality, printed/written label, and cleanliness of the workstation as:

Each completed prescription is worth 100 points:

- Calculations: 40 points (No partial credit)
- Methods: 15 points
- Product quality/elegance: 15 points
- Label: 30 points

A	90 - 100 %
B	80 - 89.999 %
C	70 - 79.999 %
D	65.0 - 69.999 %
F	< 65.0 %

Listed below are errors and their point values (Students may lose a maximum of 100 points in a lab)
